“Excellence With Morality”

Excellence means good or high quality and Morality means behaving (professionally) well based on religious morals

It takes human resources whose quality grows, not only good and stopping, so that they will lose to people of lower quality but continue to grow, and for that we need four elements. To achieve good excellence it is necessary to incorporate religious values which formed into good moral value.

Student of UNAIR should become an excellent resource in various field and maintain morality in carrying out the educational process and as a professional.

Students must also be able to create a strong academic climate and have clear targets.

An important key to support the improvement of graduate competence is translated into hard skills learning and soft skills learning.

MOTTO

VISION

To become an independent, innovative, leading Faculty of Nursing, a pioneer in developing nursing knowledge and practice at the national and international levels based on national values, ethics and religious morals.

MISSION

1. Organizing and developing academic and professional nursing education in accordance with the development of science and technology based on national values. Religious ethics and morals
2. Carrying out innovative basic research, clinics and communities to support the development of education and community service based on national values, ethics and religious morals.
3. Carrying out community service in the field of science and nursing practice based on national values, ethics and religious morals.
4. Organizing good faculty governance through the development of study programs that are quality oriented and able to compete at the national and international levels.

Foreword From Our Dean

We invite you to take a closer look at our programs that are focused on providing clinical and community health nursing education, research-based, and up-hold social-religious morale to promote quality health and address global challenges in the field of nursing. We offer the opportunity to learn about nursing with the environment and atmosphere best to achieve your lifelong goal.

Nursing is fundamentally a professional service that is an integral part of health system. As nurses we are challenged to address the unstoppable evolution of health and well-being demand. We are asked to promote health, prevent illness, assist recovering, and alleviate pains.

We facilitate you to set your own goals within the expanding sphere of nursing. It is our focus to graduate you as a nurse with recognizable standard and excellent morale.

If you are completing year 12 or finishing your diploma, bachelor or master and thinking of continuing your degree in nursing, Faculty of Nursing Universitas Airlangga provide you with three entering pathways that match to your background.

The Faculty of nursing is more to provide student centered learning to guide you achieve the set goals. Our staff and lecturers put high standards of learning outcomes and are helpful and motivational. Their decent background will introduce you to the world of nursing that are filled with expectations and challenges

Furthermore, our faculty welcomes you to seek at programs that match your expectation. Our strong links with alumni and health services both throughout Indonesia and several partnering international institutions have provided graduates with wide range of career opportunities.

Our graduates are spread not only work and hold strategic positions in hospitals and primary health services, but also in related fields like health insurances, Emergency Response Teams and Ambulance, and Quality Assurance managements in hospitals. They are also working in developed countries as nurses such as in Japan, UAE, and others.

Profil and Location

The history of the Faculty of Nursing (FKp) at Airlangga University began with the opening of the Nursing Educator Diploma IV Study Program in November 1997 which was developed at the Faculty of Medicine, Airlangga University (FK UNAIR). The foundation for the establishment of the Study Program is based on the demands of the community in improving professional nursing services and refers to the policy of developing health personnel in Indonesia as stated in the National Health System (SKN).

Judging from the description of the position of FK Unair from a geopolitical perspective, it is responsible for developing human resources, especially nursing in the Eastern Indonesia region, so the role of FK Unair is very much needed. This is because FK Unair is a respected Faculty with adequate human resources (medical personnel) and is ready to support the implementation of the Nursing Higher Education Program. With the increase in the level of education at the bachelor level level, it is hoped that it can provide learning experiences for students to foster and foster professional attitudes and skills needed as a "Professional Nurse".

The establishment of the Nursing Study Program (PSIK) at the Faculty of Medicine is the result of a joint effort between the Ministry of Education and Culture, the Ministry of Health and other related institutions which have held intensive workshops since 1998. As a next step, in December 1997 the Nursing Working Group was formed in FK UNAIR Health Sciences Consortium. The Faculty of Medicine, Airlangga University has been appointed by the Directorate of Higher Education, Ministry of Education and Culture with a Decree from the Directorate General of Higher Education No: 122 / Dikti / Kep / 1999, April 7, 1999 to organize a Bachelor of Nursing Study Program (Ners Education Program).

On June 20, 2008 based on the Rector's Decree number 5404 / J03 / OT / 2008, it was determined that PSIK FK Unair changed its status to the Faculty of Nursing.

Today the faculty of nursing Universitas Airlangga has been progressed rapidly. It provide Master, Specialist, and Doctor of Nursing study program.

International program and collaboration

International Internship

Students of the Faculty of Nursing Universitas Airlangga have the opportunity to take part in an international internship program at an overseas hospital. Students will run this internship program for the specified time duration. Knowledge that will be counted as SKS in education. This program significantly improves student experience and knowledge.

**Vice Dean of Research
Innovation Community
Development**

Dr. Esti Yunitasari, S.Kp.,M.Kes

Adjuct Professor

In connection with the worldwide collaboration of the Faculty of Nursing, Universitas Airlangga. Many lecture opportunities are given by professors from international universities. There has been a partnership built from 5 continents, namely Asia, Europe, America, Africa and Australia.

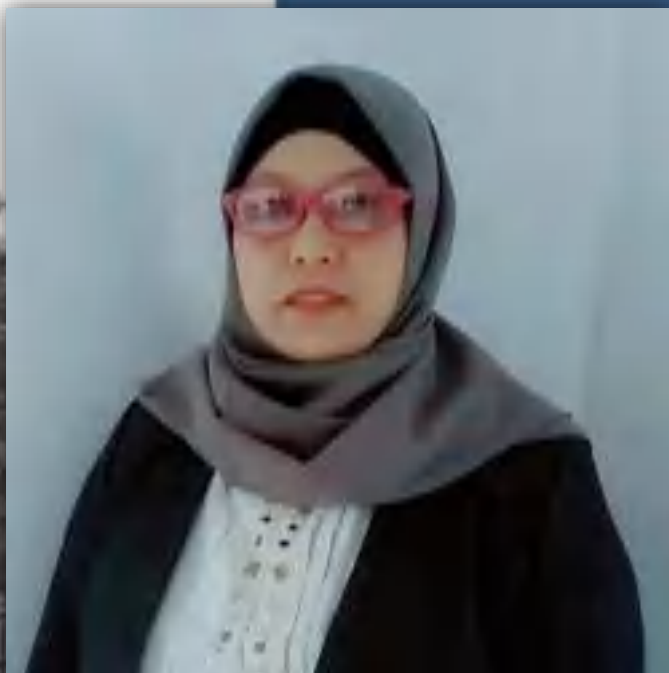

International Nursing Conference

Every year the Faculty of Nursing Universitas Airlangga holds an international nursing conference. This program connects academics, researchers, professionals, and students in an international forum. The research results or findings will be presented in this forum. The international forums offer excellent feedback and that is great. Discussions between countries form the backbone of the potential for innovation that is not limited to the world of nursing.

Educational system

International Student Forum (ISF)

International Student Forum is a platform to develop health sciences based on the latest health issues and trends. This activity is in the form of lectures and discussion forums. This is a highly anticipated moment by students of the Nursing Faculty of Universitas Airlangga because the participants of this activity are foreign health students and also local health students.

Surely in this moment students of the Nursing Faculty of Universitas Airlangga will get many new friends and can exchange ideas about health issues. This will certainly also add new insights. Not only that, this activity is also carried out culture change where each Country will display a distinctive appearance of each country.

Student Outbound

In order to actualize their studies and prepare for future careers, many undergraduate nursing study program do teacher and student outbound mobility program in various institutions abroad, according to their respective interests. Outbound mobility program is strategic plan to achieve and support 500 World University Rankings (WUR) of Universitas Airlangga. This program in collaboration with The Universiti Malaya - Kuala Lumpur, The National Cheng Kung University - Taiwan, Japanese Red Cross Kyushu International College of Nursing - Fukuoka Japan, La Trobe University - Melbourne Australia, Flinders University - South Australia, and Naresuan University - Thailand.

The activity which lasted for many days, opened with welcoming reception was followed by a various entertainments, lecture session to develop critical thinking and problem solving, and many participants were also invited to learn and visit library and hospital in university destinations.

This kind of activity is expected to be adopted in learning and career development at the Faculty of Nursing Universitas Airlangga.

Student Inbound

Student inbound is a form of cooperation conducted by the Faculty of Nursing Universitas Airlangga with International Partners. Here, the Faculty of Nursing Universitas Airlangga will receive a student exchange from an Overseas University which is an International partner. This program is carried out for program mobilization, lecture sharing, and culture change. Student Inbound activities are held annually with several students from various partner countries. This program usually lasts about 1-2 weeks. Many interesting activities are carried out in this inbound student program. Starting from sharing lectures, skill lab visit, to culture exchange. In addition, foreign students will also make visits to various hospitals, public health center, and orphanages located in Surabaya to learn to promote health education.

These foreign students will also be involved in student activities, especially in student organizations. Of course, students of the Nursing Faculty of Universitas Airlangga will be able to interact directly with the foreign students. This is one of the advantages of being a student at the Faculty of Nursing, Universitas Airlangga. Not only that, another activity that is no less interesting in this inbound student program is cooking class. Here, foreign students as well as students from the Nursing Faculty of Universitas Airlangga will cook typical food from their respective regions to be introduced. This is a precious moment that will be obtained by students of the Nursing Faculty of Universitas Airlangga.
